Luxe Reverse Osmosis System

Advanced filtration system for ultra-pure, great-tasting water in seconds. With multiple filtration stages, this system efficiently removes contaminants, turning tap water into clean, healthy, and refreshing drinking water.

Main Features

- High-performance filtration for pure water.
- Produces 2.1 liters of pure water per minute.
- Dual 400 GPD reverse osmosis membranes for enhanced filtration efficiency.
- Direct-flow technology—no need for a bulky storage tank, reducing contamination risk.
- Compact design suitable for both horizontal and vertical installation.
- All-in-one pre-filter with PP cotton layers and activated carbon to eliminate sediments, suspended particles, chlorine, pesticides, and other organic contaminants.
- Removes microplastics, PFAS, pharmaceutical residues, bacteria, and viruses from drinking water.
- Automatic flushing function to maintain hygiene and extend membrane lifespan.
- Premium water faucet with LED indicator and anti-leak sensor for enhanced safety.
- Ideal for drinking, cooking, and cleaning with pure water.

Technical Specifications

- Filter Cartridges: 1x All-in-One Pre-Filter (PP cotton + activated carbon) – Replacement every 12 months, 2x 400 GPD Reverse Osmosis Membranes – Replacement every 24 – 48 months
- Production Rate: 2.1 L/min (pure water)
- Membrane Capacity: 2x 400 GPD (combined dual membranes)
- Power Consumption: 85 Watts
- Electrical Connection: 110-240 V / 50-60 Hz
- Inlet Water Pressure: 1 - 4 bar
- Inlet Connection: ½”
- Outlet Connection: ¼”
- Wastewater Connection: ¼”
- Water Temperature Range: 4 - 38°C
- Dimensions (HxWxD): 41.5 x 10.5 x 44.0 cm
- Weight: 12.2 kg
- Product Number: H2hOme-003
